If marked Does Not Meet, additional information required:

- C1** ANALYZE NATURAL SYSTEMS
The critical areas have been mapped and classified by biologist. Development has been restricted to areas outside of critical areas. Landmark trees are being documented and assessed for long term viability.
- C2** IDENTIFY THE EXTENT AND VALUE OF WILDLIFE HABITAT AND CORRIDORS
Project site includes the upper portion of the Winslow Ravine, which ends at SR 305.
- C3** ASSESS UNIQUE AND PROMINENT FEATURES
Prominent features include mature forested stands, wetland features, Winslow Ravine and stream.

Design for Bainbridge Commercial / Multi-Family Housing Worksheet

- C4** CONSIDER THE DEFINING ATTRIBUTES OF THE BUILT ENVIRONMENT
The site is surrounded by older single-family subdivision to west, commercial area to north and forested areas. The primary relationship is to the single-family subdivision to the east. A new 10' landscape screen will help visually buffer the proposed development from the rear yards of the homes.
- C5** ANALYZE SYSTEMS OF MOVEMENT AND ACCESS
Site access to the existing residence is currently from Deercliff which terminates at the east edge of the site. This road end was originally intended to continue west to serve additional homes which were never built. Site access options also include an easement from Highschool Road and along a flag lot at the SE corner of the site. The applicant is evaluating each option for safety and traffic considerations.
- C6** STUDY HOW THE SITE RELATES TO AND CAN CONTRIBUTE TO THE PUBLIC REALM
The site can contribute to the public realm by enhancing public access through the site.

SITE DESIGN STANDARDS

- S1** PROTECT AND REPAIR NATURAL SYSTEMS
- S2** PRESERVE AND ENRICH WILDLIFE HABITAT
- S3** RESPECT AND MAGNIFY UNIQUE ASPECTS OF SITE AND CONTEXT
- S4** COMPLEMENT AND CONTRIBUTE TO THE BUILT ENVIRONMENT AND LOCAL IDENTITY
- S5** FIT THE PROJECT INTO THE SYSTEMS OF ACCESS AND MOVEMENT, PRIORITIZING PEDESTRIANS AND BICYCLES
- S6** SUPPORT AND CONTRIBUTE TO A VIBRANT PUBLIC REALM

Applicant Response – Site Design Standards S1 through S6:

- S1** PROTECT AND REPAIR NATURAL SYSTEMS
Site has a significant amount of critical areas which include the Winslow Ravine and a small wetland at the NE corner of the site. The site plan will provide required buffers and setbacks per BIMC.
- S2** PRESERVE AND ENRICH WILDLIFE HABITAT
Over 2/3s of the site will be protected as natural areas to sustain ecological functions and support habitat.
- S3** RESPECT AND MAGNIFY UNIQUE ASPECTS OF SITE AND CONTEXT
The unique aspects of the site are associated with its undisturbed natural areas which will be protected on 2/3s of the site. The site will be enhanced by a new trail system which has potential to link Ferncliff neighborhood to the STO.
- S4** COMPLEMENT AND CONTRIBUTE TO THE BUILT ENVIRONMENT AND LOCAL IDENTITY
The site design will create a new pocket neighborhood surrounded by mature native areas.
- S5** FIT THE PROJECT INTO THE SYSTEMS OF ACCESS AND MOVEMENT, PRIORITIZING PEDESTRIANS AND BICYCLES
The site will be enhanced by a new trail system which will link Ferncliff neighborhood to the STO. The site design will also include and improve an existing trail to Ace Hardware retail area to the north of the site.
- S6** SUPPORT AND CONTRIBUTE TO A VIBRANT PUBLIC REALM
The proposed attached housing units will be focused onto a central community open space.

PUBLIC REALM STANDARDS

- P1** CREATE A SAFE AND COMFORTABLE ENVIRONMENT FOR WALKING AND CYCLING
- P2** MINIMIZE IMPACT OF VEHICLES ON THE PUBLIC REALM
- P3** DESIGN TO SUPPORT A LEGIBLE HIERARCHY OF PUBLIC SPACES
- P4** STRENGTHEN PUBLIC SPACE CONNECTIONS
- P5** DRAW FROM AND ENHANCE EXISTING BLOCK PATTERNS
- P6** FOSTER INTEREST AND ACTIVITY ALONG COMMERCIAL STREETS

Applicant Response – Public Realm Standards P1 through P6:

- P1** CREATE A SAFE AND COMFORTABLE ENVIRONMENT FOR WALKING AND CYCLING
The site will be enhanced by a new trail system which has potential to link Ferncliff neighborhood to the STO. The site design will also include and improve an existing trail to Ace Hardware retail area to the north of the site.
- P2** MINIMIZE IMPACT OF VEHICLES ON THE PUBLIC REALM

BUILDING DESIGN STANDARDS

- B1** EXPRESS A CLEAR ORGANIZING ARCHITECTURAL CONCEPT
- B2** USE AN ARCHITECTURAL LANGUAGE APPROPRIATE TO BAINBRIDGE ISLAND
- B3** CREATE WELL COMPOSED FACADES AT ALL SCALES
- B4** CELEBRATE AND PROMINENTLY FEATURE SUSTAINABLE DESIGN
- B5** USE HIGH QUALITY MATERIALS AND WELL-CRAFTED DETAILS

Applicant Response – Building Design Standards B1 through B5:

- B1** EXPRESS A CLEAR ORGANIZING ARCHITECTURAL CONCEPT
The proposed building forms share multiple features including roof pitch, articulated building forms, exterior materials (natural wood, painted wood, cementitious panels) and fenestration.
- B2** USE AN ARCHITECTURAL LANGUAGE APPROPRIATE TO BAINBRIDGE ISLAND
Architectural language is meant to create a light place within the forest. The primary wall surfaces are designed to reflect natural light within the forested setting. Other materials are natural finishes and meant to blend with natural setting. The simple modern forms recall mid-century residential architecture common to the island and evolving new tradition of modern forms and materials.
- B3** CREATE WELL COMPOSED FACADES AT ALL SCALES
The facades have been carefully considered to articulate individual units while presenting a unified overall rhythm within the site. Upper floors at two story homes are setback to provide more light into sideyard outdoor spaces.
- B4** CELEBRATE AND PROMINENTLY FEATURE SUSTAINABLE DESIGN
Sustainable design is achieved with most building having south or west facing roof slopes. Another key feature is efficient use of interior space and emphasis on natural light. Fixtures will be energy efficient and low flow.
- B5** USE HIGH QUALITY MATERIALS AND WELL-CRAFTED DETAILS

Design for Bainbridge **Commercial / Multi-Family Housing Worksheet**

Building materials described above will be designed for longevity and low maintenance. Exterior details will include wood privacy screens, vine trellises, and covered unit entries.

Applicant Response - Landscape Standards L1 through L6:

- L1** INTEGRATE THE LANDSCAPE CONCEPT TO COMPLEMENT THE ARCHITECTURAL CONCEPTS
Each attached cottage will have access to a semi-private garden - patio, and the townhomes will have a generous south facing balcony. Common area landscaping will help define the transition from common areas to each unit. The central open space will be open grassy area permitting passive or active recreation. Additional landscape areas will be replanted with native vegetation to diffuse the boundary between natural and common areas.
- L2** SUPPORT THE PUBLIC REALM WITH THE LANDSCAPE DESIGN
The central open space will include features to encourage community interaction and activities, such as a play area or passive recreation.

This project is recommended for:

Approval: ☒ Thiel, Anderson, Liffgens & Aubin - yea, Russell - nay

The Design Review Board noted the below features as critical to this approval:

- While acknowledged as not a code requirement, the proposal's inclusion of a densely planted vegetated screen on the East property line is essential.
- The articulation and interplay of volumes represented as independent elements of each unit, while maintaining a harmonious composition, through the combination of fabricated concrete panel and natural wood materials with varying stain coloration, trelliswork supporting plantings, usable balconies of the depth/area shown in submitted plans and elevations, detailed entry stoops, and small terraces, provide a human scale to the project.
- The detail of planned landscape development, including plantings, tree replacement strategy, and quality of exterior fixtures and lighting.

Should there be any change to these design elements, or any other significant design changes during land use review process, it is expected that the Design Review Board will be informed, and allowed to review proposed changes to what has been presented. Additionally, the land use approval should be conditioned such that subsequent building permit must demonstrate the same design features as shown on the approved land use plans.
